

FINANCE AND EXPENSE MANAGER – FULL STACK WEB DEVELOPMENT PROJECT

Project Title: Finance and Expense Manager Web Application

Subject: Full Stack Web Development

Team Name: GraphicCodeHackers

Deployment Platform: Vercel

Submitted To: Deepak Rana

Team Members

Team Lead – Samarth

Member 1 – Tanjil

Member 2 – Simran

Member 3 – Yuvikk

Project Overview

The Finance and Expense Manager is a full stack web application that helps users track expenses, manage budgets, and analyze financial data. The application provides secure authentication, expense categorization, and visual reports. Deployment on Vercel ensures scalability, fast performance, and continuous availability.

Technologies Used

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js

Database: MongoDB

Authentication: JSON Web Tokens (JWT)

Version Control: Git and GitHub

Deployment: Vercel

System Components

Frontend interface for expense entry and dashboards.

Backend REST APIs for business logic and data processing.

Database for storing user and expense data.

Cloud deployment using Vercel.

Task Distribution with Technologies

Samarth (Team Lead): System architecture, backend integration (Node.js, Express.js), Vercel deployment, and testing.

Tanjil: Frontend development using React.js, UI design, responsiveness, and form validation.

Simran: Backend API development using Node.js and Express.js, authentication using JWT, and API testing.

Yuvikk: Database design using MongoDB, CRUD operations, data analysis features, and documentation.

Conclusion

The Finance and Expense Manager project demonstrates real-world implementation of full stack development using modern technologies. It strengthens understanding of frontend, backend, database integration, and cloud deployment while promoting effective teamwork.
